

LASER HAIR REMOVAL CONSENT FORM

The purpose of this consent form is to help you decide whether a laser hair removal (“LHR”) cosmetic procedure is right for you and to help you make an informed decision to undergo this procedure. This consent form gives you general information about LHR cosmetic procedures, explains other treatment options, and identifies the benefits, risks, side effects and possible complications associated with an LHR procedure.

- 1. LASER HAIR REMOVAL PROCEDURE.** LHR is a non-invasive laser treatment designed to remove unwanted hair from all parts of the body. The laser device works by emitting pulses of light energy that penetrate the skin and destroy hair follicles while the device’s handpiece cools the surrounding skin. Because the laser needs to fill the hair follicle to work effectively, it is important not to wax, tweeze, have electrolysis procedures, or pluck hair for 2-4 weeks prior to the procedure.

You will be required to wear protective eye glasses during the procedure to protect your eyes from the laser light. You may feel a slight burning, stinging, or pinching sensation during the procedure.

It generally takes 10 to 21 days after the procedure for the treated hair to fall out.

Treatment of dark, course hair generally achieves the best results while the removal of light, fine hair generally requires additional treatments, which may or may not be successful. Clinical results of LHR may also vary depending on individual skin type, hormonal levels, and hereditary influences. Therefore, some patients may experience partial results and some may notice no improvement at all. Future hormonal changes may cause additional hair growth.

An LHR procedure generally involves a series of treatments. Ideal candidates (light skin/dark hair) can usually achieve 65%-90% reduction with a series of 6 treatments. Thicker-skinned areas, such as men’s backs, faces, or necks, usually require more than 6 sessions and typically achieve only partial reduction or hair thinning.

- 2. ALTERNATIVE PROCEDURES.** LHR is a voluntary cosmetic procedure that is not necessary or required.
- 3. POOR CANDIDATES.** Generally, you are not a good candidate for LHR if you are pregnant, nursing, or plan to become pregnant while undergoing LHR treatments. Individuals who have used Accutane within the past 6 months or who used any medications requiring limited exposure to sunlight are not good candidates for LHR. Individuals with recently tanned skin are advised to delay undergoing the LHR procedure. The laser may not be effective on blond or gray hair. Sun exposure 2-4 weeks prior to treatment may reduce effectiveness of the laser. It is important to shave the area prior to treatment. (we do not provide shaving services; you must do this yourself prior to the treatment). Please inform us if you have an allergy to aloe.
- 4. RISKS AND COMPLICATIONS.** All medical and cosmetic procedures carry certain risks and may result in complications. Possible risks and complications associated with an LHR procedure include:

- a) Temporary reddening, burning, swelling, bruising, or discoloration of the skin over the treated area.
- b) Blistering, scarring, activation of cold sores, infection, or permanent discoloration, which may occur in rare cases. Please inform us if you have ever had a problem with cold sores.
- c) Folliculitis, which is an infection of the hair follicle and may take several days to resolve.
- d) Hyperpigmentation (darkening of the skin) or hypopigmentation (lightening of the skin), which is rare and may take several months to fully resolve.
- e) Crusting or blistering of the area exposed to laser, which is rare and may take several days to heal.
- f) As with all LHR procedures, some regrowth of hair may occur after treatment sessions are completed.

5. POST-PROCEDURE INSTRUCTIONS. It is important that you comply with all post-procedure instructions. In addition, it is important that you limit sun exposure after the LHR procedure and use protective sunscreen lotion. Please call your doctor promptly if complications develop after the procedure. Laser-treated areas should not be exposed to sun or tanning beds. Not adhering to the post-treatment skin care instructions may increase the risk of complications.

By signing this consent form, you understand and agree as follows:

The information contained in this consent form was explained to me using terms I could understand, and all my questions and concerns have been answered. After reviewing all the information provided to me about cosmetic procedures and reviewing my health status, I believe I am a good candidate for an LHR procedure.

I understand that LHR is an elective procedure and I hereby freely accept all possible risks, complications, and side effects that may result from this procedure.

I acknowledge that the LHR procedure will be performed by an employee of _____, who is properly trained and certified in its usage.

I agree to return for any recommended follow-up visits and follow all post-procedure instructions.

I understand that no guarantees have been made to me regarding the outcome of the LHR procedure.

This consent form is valid for all future laser hair removal treatments performed. I will alert the staff if I become pregnant or if there are any future changes to my medical history.
